Subject: Ottawa county well site
Date: Tuesday, January 26, 2021 8:51:50 PM

Hi Allan my name is ***** I live at ***** Down the road from Ottawa county landfill... Just curious about the well sites that are being considered. I couldn't get the permit link on the website. I was looking for information as to the function and operation. And what the site would look like? If it's a big industrial building of not a eyesoar you might say. I guess I thought the field on the south side of the road was the "buffer area" where no work was to happen.. I just wonder if driving down Garfield will feel like driving thru the landfill with fence and buildings on both sides. Or if the landscape wouldn't be affected. I'm sure this is the best option to deal with the situation at this time I'm not trying to fight the idea just concerned what it means for the community. And what protective measures will insure the protection of water... I would hate to be the ground zero of the next wolverine worldwide situation. Thanks my Phone number is ***** if a verbal conversation is easier or if you can respond to this that would be great thanks. ****
